PROFESSIONAL SUMMARY

Final-year B.Tech student and Full-Stack & AI Developer with 9 months of internship experience building web applications, AI-powered solutions, and voice automation systems. Skilled in full-stack development, AI integrations, API engineering, and scalable deployments, with hands-on experience collaborating with product teams to deliver production-ready features.

EDUCATION

B.Tech in Computer Science and Design	2023 - 2027
Sagi Rama Krishnam Raju Engineering College, Bhimavaram CGPA: 8.76	
Intermediate Education	2021 - 2023
Narayana Junior College, Nellore Percentage: 94.8%	
Secondary Board of Education	2020 - 2021
Bhashyam E.M. High School Grade: 10.0	

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript Python, C
- **Frontend:** React.js, Next.js, React Native, Tailwind CSS, HTML, CSS
- **Backend & APIs:** Node.js, Express.js, FastAPI, PHP, REST APIs, WebSockets
- **Databases & Vector Search:** MySQL, PostgreSQL, MongoDB, pgvector
- **AI Engineering:** LangChain, RAG (Retrieval-Augmented Generation), Workflow Automation (n8n, Make)
- **Tools & Deployment:** Git, GitHub, Docker, Expo, Retell AI, Supabase, Vercel, Render, Netlify.

EXPERIENCE

Software Development Engineer Intern Zennith AI	Sep 2025 – Present
• Developed full-stack features for an AI-powered business automation platform, including frontend interfaces, backend services, and AI integrations. • Integrated Retell AI voice agents and knowledge base systems to streamline customer interactions and support workflows. • Built reusable components and business workflows while collaborating with cross-functional teams to deliver production-ready features.	

PROJECTS & WEB DEVELOPMENT EXPERIENCE

<u>TermAssist</u> – Privacy-First Terminal Assistant Next.js, TypeScript, Node.js, Supabase, PostgreSQL, BM25
• Built a privacy-first terminal assistant that converts natural language queries into executable bash commands using the BM25 retrieval algorithm. • Developed a full-stack ecosystem consisting of a CLI application and a web dashboard with authentication, analytics, query history, and custom snippet management. • Implemented secure dashboard-to-CLI synchronization using Supabase and token-based authentication • Engineered an offline-first architecture capable of sub-50 ms local command retrieval while preserving user privacy.

<u>StudySensei</u> Next.js, TypeScript, Supabase, PostgreSQL (pgvector), LangChain, Google Gemini
• Built an AI-powered learning platform featuring AI mentorship, coding challenges, quizzes, personalized roadmaps, and document-based learning. • Implemented a RAG system using LangChain and PostgreSQL (pgvector) for semantic document retrieval and context-aware responses. • Developed a coding evaluation system with configurable sandbox integration support.

Web Development Experience

- [INDO-GERMAN NACHKONTAKT ASSOCIATION \(IGNA\)](#) | Oct 2024 – Feb 2026
Enhanced the official website by implementing event updates, refining UI/UX, improving responsiveness, and developing admin panels for streamlined content management.
- [SAANA – SRKREC Alumni Association of North America](#) | Apr 2025 – Dec 2025
Enhanced the official website by building admin panels, improving alumni data management and announcements workflows, and refining UI/UX for a better user experience.

ADDITIONAL INFORMATION

- **Certifications:** NPTEL Privacy and Security, Next.js & Supabase Mastery (Udemy), AWS Solutions Architect.
- **Awards/Activities:** Winner – WebTech Hackathon (CSD Dept), Participant – Social Summer of Code (SSoC) Season 4
